

Recommendations from the Task Force:

TF-1: The Creation of the Western Maryland Economic Future Investment Fund (WMEFIF)

The Task Force on the Economic Future of Western Maryland recommends legislation be introduced to create a new program to spur economic development in Western Maryland (Garrett, Allegany, and Washington Counties). The program, the Western Maryland Economic Future Investment Fund (WMEFIF) will be set up as follows:

- The WMEFIF will run for an initial pilot period of five years.
- Each fiscal year, the Governor will allocate \$20 million to fund the WMEFIF.
 - If any money remains unallocated at the end of the fiscal year, it is carried over and does not impact the budget allotment for the next fiscal year.
- The WMEFIF will receive oversight through a ten-person board set up as follows:
 - One (1) representative from the Maryland Department of Commerce who will act as chair of the oversight body,
 - One (1) county commissioner from each county,
 - One (1) representative from each county's economic development office, and
 - One (1) representative from each county's chamber of commerce.
 - The Tri County Council of Western Maryland will provide support staff to the WMEFIF board.
- Projects eligible for funding through the program will include:
 - Capital Infrastructure Projects:
 - Infrastructure projects must be linked to economic development as approved by the WMEFIF board.
 - The county the project is located in must match 20% of the amount approved by the WMEFIF board.
 - Business Development Projects:
 - This category includes, but is not limited to, capital grants, funding for downtown/area revitalization, small business tourism grants, and other items not related to capital infrastructure and as approved by the WMEFIF board.
 - The county the project is located in must match 10% of the amount approved by the WMEFIF board.
- To receive funding, projects must lead to improved economic conditions in Western Maryland. This may be shown through metrics approved by the oversight board that include, but are not limited to:
 - Created/retained jobs,
 - Number of new/retained businesses,
 - Increased wages, or
 - New state and local tax revenue.
- Each county will present potential projects to the WMEFIF board and the board will vote on whether to approve each project.
- Each year, the WMEFIF board shall generate an annual report that details:
 - The number of new projects funded that year by county;

- The number of completed projects that year by county;
- The number of ongoing projects by county;
- For each project, the amount of funding provided by the WMEFIF;
- For each project, relevant economic metrics; and
- For each project, the progress made or outstanding.
- If the WMEFIF board determines that insufficient progress has been made after a project receives funding, or that a project did not sufficiently deliver on its promises, the board will be able to claw back the award.
- For any given project, The WMEFIF does not replace existing funding opportunities from other state programs. Instead, the WMEFIF serves to enhance existing economic development opportunities and resources in the region.

TF-2: Revisions to the Maryland Innovation Initiative

TEDCO operates the Maryland Innovation Initiative (MII) that promotes the commercialization of research occurring at Maryland's five research universities:

1. Johns Hopkins University;
2. Morgan State University;
3. University of Maryland, Baltimore;
4. University of Maryland, Baltimore County (UMBC); and
5. University of Maryland, College Park.

Since the program's inception in fiscal year 2013, MII has awarded 252 grants and 74 investments across a diverse range of industries such as life sciences, engineering, and information technology. Companies supported by MII have found success, and 57 percent of MII companies raise follow-on funding within two years.

Although the program has been successful, it is currently limited by statute to the state's five research universities. Expanding MII to additional universities could allow for enhanced economic development opportunities across Maryland.

To this end, the Task Force on the Economic Future of Western Maryland recommends legislation be introduced to establish a pilot expansion of MII at Frostburg State University, located in Allegany County. A pilot program would work as follows:

- For FY 2023 and FY 2024, the Governor shall include an appropriation of \$500,000 for the pilot program.
 - This funding shall be used to supplement, not supplant, any funds that would otherwise be provided to MII.
- Frostburg State University shall pay an annual contribution of \$50,000 in FY 2023 and FY 2024.
- To be eligible for funding under the pilot program, a project must:
 1. Support the creation of a new technology-based business in Maryland;
 2. Advance technology toward commercialization of a product or service;
 3. Foster entrepreneurial development at Frostburg State University;
 4. Create an opportunity for meaningful economic impact in the region around Frostburg State University; or

5. Foster collaborations between the university and an industry partner and must include:
 - Product development with commercialization potential; and
 - Matching funds provided by the industry partner.
- TEDCO will provide the General Assembly with a report on or before July 1, 2024 summarizing the implementation of the pilot program at Frostburg State University.

TF-3: Enhancements to the Maryland E-Innovation Initiative Fund

The Maryland E-Innovation Initiative Fund (MEIF) is currently administered by the Maryland Department of Commerce. The program is designed to encourage research endowments at Maryland's colleges and universities. Through MEIF, the state provides matching funds to funding that institutions of higher education have secured from private sources in support of research endowments. The program has had considerable success. In fiscal year 2019, the state awarded eight Maryland colleges and universities a total of \$95 million in matching funding and in fiscal year 2020, the state awarded six institutions \$8.5 million in matching funds. While the program has made an impact, mandated funding is currently set to expire at the end of fiscal year 2021. Additionally, smaller colleges and universities have encountered challenges in providing matching funds. The Task Force on the Economic Future of Western Maryland recommends that legislation be introduced to extend the mandated funding period beyond fiscal year 2021. Additionally, the task force recommends that the MEIF matching requirements for smaller institutions be relaxed slightly so that the benefits of research endowments can be distributed more broadly across the state.

TF-4: Public Private Partnerships on State Land

Western Maryland's parks and campgrounds are a crucial component of the region's tourism industry. Ensuring that these resources are well maintained is essential to ensuring that more visitors come to the region. The Task Force on the Economic Future of Western Maryland recommends that the Maryland Department of Natural Resources (DNR) explore a public-private partnership within one of Western Maryland's parks or campgrounds. Through this partnership, DNR would lease one property to a private partner. The private partner would operate, maintain, and expand existing facilities at the property with the approval of DNR. This arrangement would yield a new revenue stream to the state as well as ensure that the region's tourism industry continues to thrive.

TF-5: Turn State-Owned Land Over to Counties for Economic Development

The State of Maryland owns a substantial amount of land in Washington, Allegany, and Garrett counties. The State of Maryland can leverage this ownership to encourage economic development across Western Maryland while still preserving the region's natural resources and splendor. The Task Force on the Economic Future of Western Maryland recommends that the State of Maryland work with each county in the region to identify key parcels of land that counties can use for critical business development projects. For these parcels, the task force recommends that the state and counties identify ways for this land to be turned over to the counties. For example, the State currently owns an 800+ acre parcel in Garrett County at the intersection of 219N and I-68 in Grantsville. This parcel could be the site of a successful business park due to its access to quality transportation in the region if the site were turned over to Garrett County.

TF-6: Allocate Additional Funding to Maintain State-Owned Lakes

The State of Maryland owns 16 lakes, many of which are located in Western Maryland. These lakes are economic engines, generating hundreds of millions of dollars in economic impact each year and in many cases supporting a substantial property tax base along the lake shores. Maintaining these lakes ensures the longevity of these resources for the localities that depend on them. As such, the Task Force on the Economic Future of Western Maryland recommends that the Governor add an additional line item of \$3 million per year to the Maryland Department of Natural Resources' budget in order to maintain state-owned lakes. This funding should not supplant existing funding going to the Maryland Department of Natural Resources.

TF-7: Support enactment of the Maryland Technology Infrastructure Fund

In the 2020 legislative session, SB 270/HB 343 would have created a program within TEDCO to provide operating and capital grants to support technology-based projects in Maryland. The Task Force on the Economic Future of Western Maryland recommends that this bill be resubmitted in the 2021 legislative session and that it be amended to specifically require an Authority member from Western Maryland and to provide enhanced financial benefits or priority consideration to projects in Western Maryland.

TF-8: TEDCO's Rural Business Innovation Initiative (RBII)

TEDCO's Rural Business Innovation Initiative (RBII) assists start-up and small technology-based businesses in the rural areas of Maryland to advance the company to a higher level of success. The program offers professional ongoing mentoring and targeted funding at no cost to the company. Currently, TEDCO does not have specific state funding for this program. Despite the lack of dedicated funding, TEDCO allocates \$500,000 from their operating funds to provide the network assistance and for a small pre-seed investment fund. While the program receives relatively limited funding, the investments to date show great promise as 87 percent of funded companies are still in operation.

The Task Force on the Economic Future of Western Maryland recommends that the Governor include an appropriation of \$500,000 to fund the RBII, and that this funding be used to supplement, not supplant existing TEDCO funding.

TF-9: Support Tax Credits and Programs Designed to Allow Maryland's Tourism Industry to Recover from COVID-19

Maryland's tourism industry has faced unprecedented challenges in the wake of COVID-19. The industry is critical to the economies of all of Maryland's regions and Western Maryland is no exception. The Task Force on the Economic Future of Western Maryland recommends that the Governor support efforts to allow Maryland's tourism industry to rebuild from the current economic crisis.

TF-10: Support Tax Credits That Encourage Additional Market-Rate Housing in Western Maryland

The Task Force on the Economic Future of Western Maryland recommends that the Governor establish tax credits that would incentivize the construction or renovation of properties to increase the supply of market-rate housing in Western Maryland. In order to attract and retain the necessary workforce to

power the industries and companies of Western Maryland's future, the region needs to ensure a sufficient supply of housing is available for workers. If not, otherwise successful businesses in Western Maryland may leave for an area where it is easier to attract and retain a talented workforce.

TF-11: Support Small Business Participation in Association Health Plans

The Task Force on the Economic Future of Western Maryland recommends that the Maryland General Assembly amend the Maryland Healthcare Access Act of 2018 to remove language prohibiting small businesses from including their owners, employees, and family as part of the larger pool of employees in an Association Health Plan.

TF-12: Redefine the meaning of Qualifying Biomass and a Thermal Biomass System

The Task Force on the Economic Future of Western Maryland recommends that Maryland's Renewable Portfolio Standard (RPS) be amended so that:

1. The definition of 'qualifying biomass' is updated to include wood products, including mill residues, silvicultural products, and natural wood wastes.
2. The definition of a 'thermal biomass system' be updated to include qualifying biomass.

These two changes will support Maryland's transition to green energy as well as support Western Maryland's robust forestry industry.

TF-13: Encourage the State of Maryland to Identify Priority Trail System Opportunities for Advancement in Western Maryland

Trail systems, whether hiking trails, rails-to-trails paths, or multi-use networks are a critical component of Western Maryland's tourism ecosystem. The Task Force on the Economic Future of Western Maryland recommends that the Maryland Department of Natural Resources, the Maryland Department of Transportation, and the Maryland Department of Commerce work closely with each county in the region to identify priority trail systems to create or to enhance. To the extent that counties already have identified key projects, the task force recommends that Maryland's state agencies work aggressively to ensure projects are completed.
